

Collins- Your First Source for MRSA Information & Products

The Facts About MRSA – Methicillin-resistant staphylococcus aureus

MRSA is a rapidly progressing bacteria that attacks the soft tissue area of the skin and can become systemic by entering the blood stream endangering joints and vital organs. MRSA is a major concern today as strains of bacteria have developed a resistance to the most common antibiotics used for treatment. MRSA is typically spread via contact with infected skin or infected surfaces and can live for months on your skin, surfaces and fabrics if left untreated.

**MRSA can live on your skin, in your clothing, in your environment and on surfaces for months if untreated.*

**MRSA can be transmitted from surface to athlete, athlete to surface, athlete to athlete, health care professional to athlete and from your environment such as textiles, etc.*

** You must clean and protect your surfaces with products like Cavicide and SilverClene.*

** Your athletes must practice good hygiene and wash and shower with products like Hibiclens.*

** You must clean and protect your linens and uniforms with a product like Goldshield G101.*

5 Simple Steps to Prevent MRSA

1. **Kill It** – Clean all hard surfaces, i.e. tables, countertops, whirlpool, floors, etc with a product proven to kill MRSA. A hospital grade disinfectant like Cavicide Surface Disinfectant will provide an immediate kill.

MX-3308	8 oz spray bottle	\$3.95
MX-3324	24 oz spray bottle	\$7.95
MX-3300	Gallon Refill	\$20.25
13-1100	CaviWipes, XL, 160/tub	\$7.90

2. **Protect Against It** - Once your surface is clean, it can easily become recontaminated if you don't protect the clean surface. By spraying your clean surface with SilverClene by Agion, your sterile surface will remain protected for up to 24 hours. This eliminates the potential for cross contamination and the use of harmful chemicals as SilverClene is an all natural product. For more information see www.Agion-Tech.com.

ASC-004	Sampler, 4 oz	\$3.95
ASC-024	Spray bottle, 24 oz	\$7.95
ASC-100	One Gallon	\$19.95
41713	22 oz. empty spray bottle	\$1.95

3. **Protect Yourself** - Typical alcohol based hand sanitizers provide an immediate kill but are not long lasting. They must be frequently reapplied and tend to dry the skin. Safe4Hours with aloe and coconut oil, is an alcohol free hand sanitizing lotion that kills 99% of germs on skin. Most importantly Safe4Hours will provide protection for up to 4 hours while keeping hands moisturized. For more information, see www.Safe4hours.com

1008S	Sanitizing lotion, 2 oz	\$4.75
1046	Sanitizing lotion, 8 oz	\$14.95
1053	Refill 16.9 oz bag for wall mounted dispenser	\$28.95
4113	Wall mounted dispenser	\$14.95

4. **Protect Your Athletes** - Kill and prevent the spread of MRSA on your athletes by having them wash and shower with an antimicrobial skin cleanser like Hibiclens. Hibiclens will kill germs on contact and bonds to the skin to keep killing microorganisms up to 6 hours after washing. For more information, see www.HibiGeebies.com.

1125657	4 oz	\$5.75
1125277	8 oz	\$7.95
1171016	16 oz w/pump	\$12.95
1124833	32 oz	\$16.95
1124858	Gallon	\$60.95
HIBISTATTOW	Wipes 50/box	\$21.95
59996	Wall mount dispenser for 16 oz bottle	\$29.95

5. **Protect your uniforms and linens** - Uniforms and linens also need to be treated with a MRSA killing agent and long lasting protectant. When added to your laundry, Goldshield Fabric additive will kill MRSA in your towels, uniforms and linens. Your linens will be protected for 24 hours.

G101	Antimicrobial detergent additive 1 gallon concentrate	\$25.95
